

ARCHIDATA PLAN ROOM

Central Repository of All Project Files

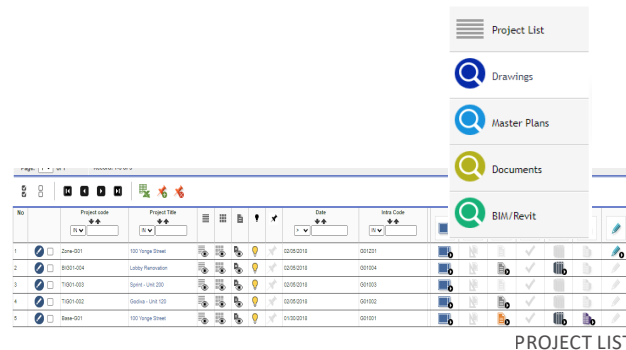

The Plan Room manages all files from projects, including AutoCAD drawings, Revit and IFC files and documents in all formats. It includes a dashboard of all projects with an online approval tool, a global search engine and specific search engines for drawings, master floors plans, Revit and IFC files and documents.

Project files can be classified by discipline/specialty, firm, building, floor, project code and many other parameters.

BENEFITS

- Saves time in searching and distributing project files
- Access to the most recent plan securely and rapidly
- Reduction in errors and time saving during construction
- Time saving by minimizing idleness during planning and construction
- Easy information recovery following employee turnover
- Data centralization for the operations team after end of project
- History of all construction projects

The Plan Room allows users to view drawings and Revit files easily without an Autodesk license and uses a secure ordering system to download files. It also facilitates communication between stakeholders during projects with an integrated notification and email system.
