

2D Digital Twin of Portfolio with Inventory of Spaces and Occupancy

The Portfolio Dashboard gives property owners an overview of their portfolio including the list of buildings, units, rooms, square feet, volumes, occupancy and available spaces. It includes stacking plans in different formats (multi-region, multi-property and single property), color-coded floor plans, a search engine with multiple criteria and a leasing tool to promote available spaces.

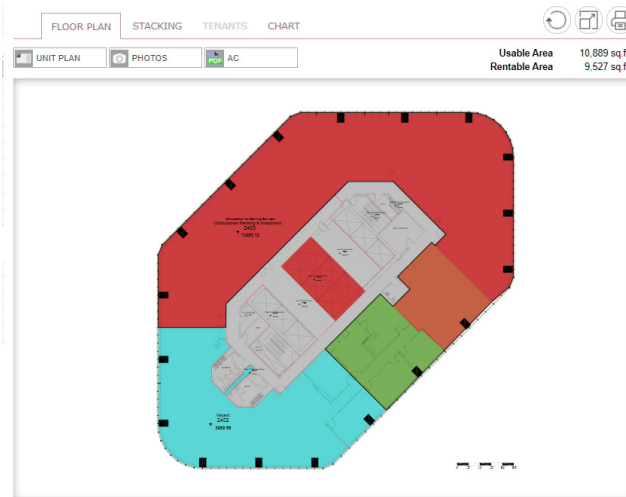

By integrating to the financial system, the Portfolio Dashboard is the perfect extension as it publishes and visualizes financial data on floor plans and 3D interactive models. The Portfolio Dashboard can also publish different data sets.

BENEFITS

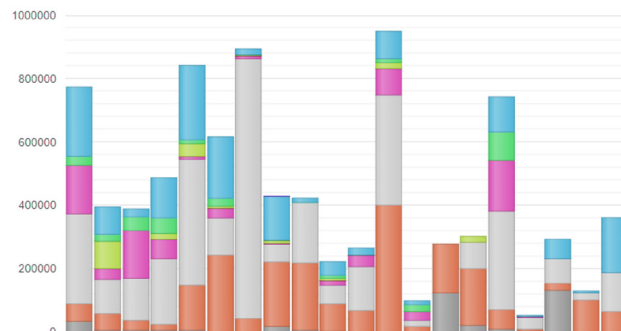

- Quick visual overview of portfolio inventory of spaces and occupancy
- One module/window for all leasing tools – unit drawings, tenant information, tenant charges and lease clauses and options
- Multiple financial and energy data sets can be displayed in a stacking chart
- Technical sheets of available spaces automatically generated with PDF of unit and floor drawings
- Quick access to available spaces with search engine
- Quick access to building and unit reports
